

Planning Commission Report – January 2024

We welcomed Brad Donohue to his first Planning Commission meeting with everyone sharing some of their background. The only business was continuing evaluation of the Development Code. Walt added some new material in the Parking, Streets and Land Lot Divisions section. In some cases, he addressed subjects that are not in 77-01, present code or Title 9. In most cases we kept those recommendations although we did pair down some of them. We used existing ordinances to modify his content to have the same meaning as existing ordinances for the subjects already addressed in 77-01, the Zoning Ordinance or Title 9. He did fully integrate 77-01 into the proposed Development Ordinance and updated the language - which needed it - while doing so .
